## Commercial Lawn Fertilization

---

[Fertilizing lawn](#) can turn unsightly and patchy lawn into a green carpet of smooth and rejuvenated grass. This doesn't imply that you go to the garden store and pick up any lawn fertilizer and bingo! You are done. It boils down to knowing that different types of lawns have different nutrient requirements. Our experts know this, and that's why ***we tailor our lawn fertilizer to each individual business's needs***. We analyze the soil, establish existence if any of turf disease, and evaluate any weed or insect problems. Working with ***Big League Lawns takes out the hassle and risk associated with choosing the wrong fertilizer***. Our tailored approach ensures that your commercial lawn receives the exact kind and amount of fertilizer it needs to grow to its full potential.

## Commercial Lawn Aeration

---

***The benefits of lawn aeration for businesses cannot be overstated, especially for commercial buildings with foot high traffic. Lawn aeration is the process of poking holes in the lawn and pulling up small cores so that the grass has a constant supply of air, water, and nutrients that are vital for it to thrive.*** This also improves the water

drainage. Poor drainage creates a damp environment that is a breeding ground for mosquitos and other pests. Aerating your lawn also saves your water as the water sprinkled seeps deep into turf away from dehydrating elements; the sun and wind.

## Commercial Bug Barriers

---

We've all had instances when a serene and tranquil moment is interrupted by bugs and crawling insects be it indoors or outdoors. Our products are specially formulated to exterminate spiders, earwigs, and other crawling insects. ***Spraying a bug barrier not only kills the insects upon contact, but also creates a barrier that future pests will not cross.***

Lawns can also be a breeding ground for mosquitos. While it is impossible to eliminate every mosquito as they are flying insects, our repellent can deter a big number and kill eggs laid in standing water or moist soil. Our treatment repels mosquitos for 3-4 weeks.
