Reviews

Many companies offer a Lower Price; but they may have Low Ratings that come with it! In this business, you can't be the Best and be the Cheapest at the same time. Every week we talk to people that went with the lowest price they could find in the past and are now looking for better results.

Do your homework... Google, Home Advisor, and Facebook are a wonderful place to start.

Experience

What is the experience level of the person setting up your lawn care program when you call a company? Have you called a company and reached a telemarketer that has less experience on lawns than you the homeowner? ***When you call Big League Lawns, you get either an owner, or a previous technician that has spent years treating lawns and actually knows what your lawn needs – not someone driven by corporate sales goals***

Big League Lawns is a Local company!

Need to call and ask a question about your account? Reach us right here in Ogden, not out of state. While some companies claim to be local to get your business, they may actually be headquartered out of state. Several big-name lawn care companies doing business in Utah are actually based in Tennessee, Washington, New Jersey, and even Canada. ***Our profits are spent & reinvested right here in Utah, not sent out of state to large corporations.***

We Give Back

Teaming up with Big League Lawns does more than just feed your lawn. We are proud to say part of your money each month is donated to [Food for the Hungry!](#) The goal of this charity to help needy children with the basics: food, water, education and more. When you become a Big League Lawn customer you also help sponsor a child in need! **Together we can help save starving children around the world one child at a time.** In our regular newsletter we highlight some of the children we sponsor.

Fertilizer Made in Utah

A great looking lawn starts with the right fertilizer. This isn't something you want to do on your own. Choosing the right fertilizer for your soil is a science that involves knowing the right blends of nutrients and the exact quantities of fertilizer for the specific needs of each individual lawn. If you add too much or too little fertilizer to your lawn, the end result can be even worse, not to mention the time and money it might take to fix it. Let us use our expert knowledge of soils to use just the right fertilizer for your lawn to keep it lush and healthy all year round.

Make the Best Use of Your Time and Money

Taking care of a lawn on your own takes a lot of research, physical labor, and money. Not to mention the stress and hassle of guesswork. When you let the experts take over, you can save yourself a lot of work, frustration, time, and money. Instead, you can sit back, relax, and focus on the things that matter the most to you.

Satisfaction Guaranteed

The lawns we service are a visual reminder of the quality of our work. If it doesn't look right, we want to know about it right away. We put in a lot of work and research to take good care of your lawn, so you don't have to.
